1 Introduction

The autolisp-host system defines the Host Abstraction Layer protocol (ent-get/ssget/getvar/command/...) and the NullHost reference implementation.

This document is a stub seeded by documentation-synchronisation.issue.
Audience: developer of the project.

2 Scope

Specifications: what autolisp-host should do.

3 Topics

- Goals and contract- Public interfaces (functions, structs, packages)- Internal invariants- Test coverage expectations- Open questions / decisions deferred

4 References

- Source code: see the subproject's **source/** directory.
- README: **README.org** in the subproject root.
- Plan / roadmap: **PLAN.md** in the subproject root.
- Sibling tracks: autolisp-host-user-manual.org

5 Synchronisation

Per the project-wide synchronisation rule (**AGENTS.md**, Documentation Synchronisation section), changes to the code, the autolisp-host specifications, this user-manual, or the man page (where applicable) must be propagated to every track.
