5	Synchronisation	2

1 Introduction

How to attach a backend to the HAL protocol and drive AutoLISP code against a chosen host.

This document is a stub seeded by documentation-synchronisation.issue.
Audience: user / integrator.

2 Scope

User manual: how autolisp-host is used.

3 Topics

- Installation- Loading + entry points- Usage examples- Configuration knobs- Troubleshooting- See also (specs, source, related projects)

4 References

- Source code: see the subproject's **source/** directory.
- README: **README.org** in the subproject root.
- Plan / roadmap: **PLAN.md** in the subproject root.
- Sibling tracks: autolisp-host-specifications.org

5 Synchronisation

Per the project-wide synchronisation rule (**AGENTS.md**, Documentation Synchronisation section), changes to the code, the autolisp-host specifications, this user-manual, or the man page (where applicable) must be propagated to every track.
