Contents

1	Introduction	1
2	Scope	1
3	Topics	1
4	References	1
5	Synchronisation	2

1 Introduction

How to build the Qt renderer, attach it to clautolisp via `-gui` CMD, and the wire-protocol contract.

This document is a stub seeded by `documentation-synchronisation.issue`.
Audience: user / integrator.

2 Scope

User manual: how clautolisp-gui-qt is used.

3 Topics

- Installation- Loading + entry points- Usage examples- Configuration knobs- Troubleshooting- See also (specs, source, related projects)

4 References

- Source code: see the subproject's **source/** directory.
- README: **README.org** in the subproject root.
- Plan / roadmap: **PLAN.md** in the subproject root.
- Sibling tracks: clautolisp-gui-qt-specifications.org

5 Synchronisation

Per the project-wide synchronisation rule (**AGENTS.md**, Documentation Synchronisation section), changes to the code, the clautolisp-gui-qt specifications, this user-manual, or the man page (where applicable) must be propagated to every track.
