1 Introduction

The autolisp-init-files system implements the user-init-file lookup chain (`~/.clautolisp{,rc}`, `~/.autolisp{,rc}`, `~/.config/clautolisp/init`, `~/.config/autolisp/init`) and the no-init env-var policy.

This document is a stub seeded by `documentation-synchronisation.issue`.
Audience: developer of the project.

2 Scope

Specifications: what autolisp-init-files should do.

3 Topics

- Goals and contract- Public interfaces (functions, structs, packages)- Internal invariants- Test coverage expectations- Open questions / decisions deferred

4 References

- Source code: see the subproject's `source/` directory.
- README: `README.org` in the subproject root.
- Plan / roadmap: `PLAN.md` in the subproject root.
- Sibling tracks: `autolisp-init-files-user-manual.org`

5 Synchronisation

Per the project-wide synchronisation rule (`AGENTS.md`, Documentation Synchronisation section), changes to the code, the `autolisp-init-files` specifications, this user-manual, or the man page (where applicable) must be propagated to every track.
